

RORY MERTES He/Him

Digital Media and Marketing Assistant

These are a few of my favourite things

Rory joined the Service Design Academy in April 2021, as part of the Scottish Government's Kickstart (work experience) scheme, as the SDA's Digital Media & Marketing Assistant.

Rory has had a passion creating online content for a long time, making youtube videos from as young as 11 years old.

He has previously worked for Astute Printing, creating social media posts and videos for them. Additionally he runs a video game community which involves a lot of online activity, running competitions, tournaments, creating graphics and editing videos.

Rory finished his final year of Secondary School in 2017, and initially studied game design at Abertay University, realising it wasn't the career choice for him he left in 2020, obtaining a Diploma of Higher Education Merit, to pursue a different career.

He now helps a lot with the Service Design Academy's online presence, primarily in creating social media posts along with graphics, writing blogs, and editing videos.

Qualifications:

Diploma of Higher Education Merit
